

I am a flight attendant and i am writing to encourage you not to allow the use of cellphones onboard commercial aircraft. one reason there is no clear evidence that they do not interfere with cockpit communication. two in the age of terrorism these phones could be used to assist in carrying out a terrorist act. three it would make the working lives of the flight attendant very complicated. we would be required to police the cell phone use break up fights that this is going to cause and that takes us away from our safety duties that we are there to perform...please do not allow cell phone use onboard our aircraft
